WHAT IS SMART CONTRACT?

Smart contract allows **credible and safe transactions without the need for a third party.**

It allows you to safely exchange money, tokens or anything of value in a transparent and safe way without any middlemen.

It bonds buyer and seller with an agreement and automatically ensures their cooperation, for the transaction to be executed..

WHY DECENTRALIZED APPLICATIONS (DAPP)?

Decentralized application can not be controlled by a single person, administrator or a company. (they are spread out across the decentralized network and so there is never a single point of entry to them) They run across many machines and can only be controlled by its users. This is possible thanks to **the Blockchain**.

A **Decentralized** Application Offers

- Transparency.
- Security.
- Speed, efficiency and reliability.
- No censorship

- No third-parties
- Community involvement
